

DSMdat

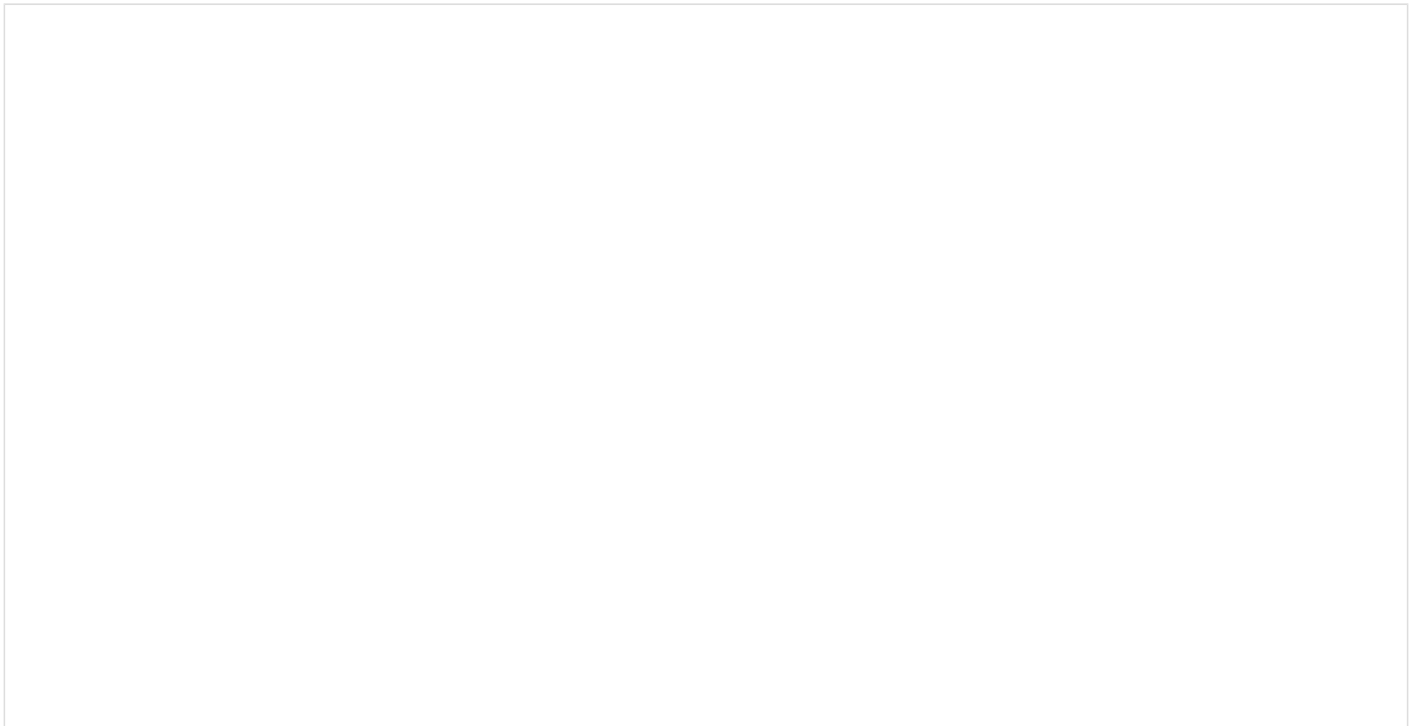

Build and improve your DSM portfolio with access to detailed program profiles from across North America

[Subscriber? Go to the tool](#)

DSMdat is our database of thousands of demand-side management (DSM) programs in the US and Canada. It provides the most user-friendly and comprehensive reporting available today on energy-efficiency, load management, demand-response, and customer-sited renewable generation offerings from electric and gas utilities, government agencies, and nonprofit organizations.

With DSMdat, you'll get insights into:

- The programs other utilities in your state or province—or in the entire US or Canada—are running
- How your portfolio of programs compares to that of similar utilities
- How much of an incentive other program administrators offer
- The measures that other programs include

The screenshot shows a software interface with a table. The table has three columns: 'Name', 'Date', and 'Amount'. The 'Name' column contains the text 'John Doe'. The 'Date' column contains '2023-10-27'. The 'Amount' column contains '100.00'. There are also some other elements visible in the interface, such as a header bar and some text labels.

| Name | Date | Amount |
|----------|------------|--------|
| John Doe | 2023-10-27 | 100.00 |
