

One utility's winning LinkedIn strategy

By Anna Nixon, Angelica Pereira

March 30, 2022

As part of its [On The Spot Light](#) campaign, National Grid used LinkedIn and other social media platforms to promote in-store, distributor's counter lighting incentives to commercial and industry customers. Ads directed key accounts to the utility's [On The Spot Light Incentive Program](#) web page for a list of products and a store locator tool (**figure 1**).

Figure 1: National Grid's On The Spot Light campaign

National Grid used LinkedIn static ads (A) and InMail ads (B) to promote its campaign. The utility shared that InMail ads allowed for more-detailed messaging.

B. LinkedIn InMail ad

Subject Line: We've got a bright idea to save energy.

In its [Energy AdVision](#) entry, National Grid explained how effective the campaign was:

We continue to hear from participating distributors about the effectiveness of the campaign to aid in the adoption of energy-efficient lighting. Their customers are being driven to the store by the online ads, they are interacting with in-store elements and taking advantage of this opportunity to help cut energy use.

Campaign results from InMail ads included:

- 1,500 impressions
- 10 clicks

- 4% open rate
- 621 opens
- 543 website sessions to the campaign page, seeing 527 new users
- 37 PDF downloads

More examples of using LinkedIn for recruiting and marketing

Members of the E Source [Corporate Communications Service](#) or [Business Marketing Service](#) can read our report [Creating a winning LinkedIn strategy](#) for more examples.

Targeting business customers with LinkedIn

Utilities with strong social media strategies use a multichannel approach to reach specific audiences with relevant content. LinkedIn is an important part of a well-rounded utility social media presence.

In the E Source 2021 [Social Media Survey](#), we asked 27 US and Canadian utilities which channels they use to communicate with specific audiences (**figure 2**). These utilities use LinkedIn to communicate mostly with:

- Potential employees
- Small and midsize business (SMB) customers
- Key account customers

Figure 2: Utilities' target audience on LinkedIn

Most utility respondents use LinkedIn to recruit new employees and communicate with business customers. Some respondents use LinkedIn to reach residential customers, news outlets, or trade allies, but those audiences were less common.

Base: All respondents (n = 27 utilities). **Question S1:** Please indicate which of the following social media channels your organization currently uses for communicating with the following audiences. Select all that apply for each channel. **Note:** No data is shown when sample size falls below 30. © E Source (2021 Social Media Survey)

According to the [LinkedIn ads](#) web page, four out of five LinkedIn members make business decisions. And content marketing agency Questline states that LinkedIn “is an ideal way to reach business customers,” in its article [Best Practices: Social Media Strategy for Energy Utilities](#).

Utility ad campaigns to inspire your efforts

In this post, we feature utility ads from E Source [Energy AdVision](#), our database of thousands of examples of utility marketing and advertising campaigns.

Utilities can connect with business customers on LinkedIn by:

- Posting original content or reposting relevant content
- Running targeted ad campaigns for relevant utility offerings
- Messaging business owners directly about relevant utility offerings

LinkedIn explains how to track the performance of your content using [Analytics for Your Posts, Articles, and Videos](#).

Amplify your utility's voice with social media

While initially slow to adopt social media, utilities are now taking advantage of the power of the platform. Social media as a whole is an additional line of communication to employees and customers.

Channels such as LinkedIn will amplify messaging and help reach a broader audience. Some of the most popular ways utilities are using their social media voices include:

- Communicating about outages or emergencies
- Delivering public safety announcements
- Ensuring customer satisfaction
- Promoting programs and special offers

Certain E Source members can find more examples in our report [Creating a winning LinkedIn strategy](#).
