

E Source announces presence at CS Week Conference 48, celebrates client wins

By Adarsh Nalam

April 23, 2024

E Source, a utilities-focused consulting, research, and data science company, has announced its plans for [CS Week Conference 48](#) in Fort Worth, Texas, April 29–May 2. Along with exhibiting, speaking, and sponsoring segments at this year’s conference, E Source is celebrating two client wins—the City of Tallahassee, Florida, and Citizens Energy Group—at CS Week’s Expanding Excellence Awards.

Citizens Energy Group and the City of Tallahassee, Florida, are winners of the Expanding Excellence Awards.

Every year, CS Week, a utility conference, establishes a judging panel to select winners in six categories (four company awards and two individual awards) for its customer experience (CX)-focused Expanding Excellence Awards. The categories are:

- Best CIS Implementation
- Innovation in Digital Engagement
- Innovation in Field Automation
- Innovation in People & Success
- Rising Star
- Distinguished Leader

Categories feature two awards based on company size: Level I for utilities with more than \$1 billion in gross

revenue and Level II for those with less than \$1 billion in gross revenue.

- [The City of Tallahassee](#) has won the [Innovation in Digital Engagement \(Level II\) award](#) for implementing a new customer information system (CIS), meter data management system (MDMS), and customer self-service (CSS) portal to improve service delivery, provide more self-service options, and streamline data management.
- [James Barnes](#), chief customer operations officer of the City of Tallahassee, has won the [Distinguished Leader](#) individual award for overseeing the city's CIS and MDMS implementation and for planning other multiyear enterprise-wide initiatives, including work and asset management, mobile work and outage management systems, an interactive voice response system migration, and a prepay program.
- [Citizens Energy Group](#) has won the [Innovation in Field Automation \(Level II\) award](#) for deploying a field service management system for work orders, inventory, time sheets, vehicle tracking, and asset location, which was integrated with the utility's new CIS.

"It's rewarding to see Citizens Energy Group and the City of Tallahassee be honored at CS Week for their commitment to improving CX. We're confident that these clients and others will continue to generate measurable business results through our utilities-focused consulting, data science, and research solutions," said [Dave Perotti](#), CEO of E Source.

The City of Tallahassee selected E Source to provide software selection and project implementation leadership services to support the replacement of the city's CIS, MDMS, and CSS applications. The program involves coordinating multiple software companies and integrations.

Barnes said, "We are honored to receive the 2024 Expanding Excellence Award for modernizing our CX life cycle. Having not replaced a CIS in many years, we needed a partner with industry knowledge and expertise in program management to help us address the many challenges of a complex software replacement."

E Source led Citizens through the assessment and selection of a new field service management solution. Using E Source's proprietary methodology, Citizens selected a solution provider to meet its organizational goals.

"We want to thank CS Week for acknowledging our dedication to improving our customer experience with an Expanding Excellence Award," said [Melissa Lawson](#), director of Shared Field Services at Citizens. "We would also like to extend our gratitude to our partner, E Source, for the consistent support throughout the project. With the help defining our requirements and evaluating various software applications, we were given the confidence that our implementation would successfully serve our customers."

E Source's presence at CS Week 2024 includes hosting a [client appreciation social evening](#) and a speaking session on using analytics to enhance CX and predict satisfaction, featuring [Chris Hilborn](#), VP of Customer Insights & Solutions at Liberty Utilities, and [Chad Garrett](#), managing director at E Source. The company is also cosponsoring the [Women in Utilities Sunrise Event](#).

To learn more about E Source at CS Week, attendees can visit the E Source booth #206 at the Fort Worth

Convention Center.
